

# TeleCraft™

## Small Business Telephone Systems

**TeleCraft simplifies your life and improves your communication. It offers you big business capabilities at a small business price.**

- System size: 6 x 16, or 3 x 8.
- Phones: Executive display phones, home and cordless phones.
- Voice mail: 3 ports, 2 to 8 hours, 34 mailboxes, 6400 messages.
- Auto attendant: 3 attendants support 2 businesses.
- Caller ID: Yes, Type 1 and Type 2.
- Wiring: Home run, cordless phones.

- The most comprehensive feature set.
- Internal voice mail - seamlessly integrated.

**Simple installation. Easy to use.**

**TeleCraft meets your needs, and slightly more.**

**Lines and extensions** - Start with 3 external lines and 8 extensions and grow to 6 x16.

**Display phones** - Our affordable executive phones let you easily access the features that TeleCraft offers. Just press the voice mail button to access your messages or press the LINE buttons to answer a ringing line. The display and blinking lights provide you with visual information about your calls and messages left for you.

**System console** - The console displays line and extension status. A quick glance at it tells you which lines are available, and which ones are busy, on hold, or ringing. It also provides ringing tones when a call arrives on any of the incoming lines. Furthermore, the console lets you converse hands-free with anyone in the office and can be used for office-wide public announcements. It works with any phone and can be connected to all of the stations.

**Other phones** - TeleCraft works with your existing home-type phones, including cordless. You can mix-and-match phones based on your needs and budget.

**Additional equipment** - Safely add your modems, FAX machines, gate and door entry systems, security systems, etc.

**Voice mail** - Our integrated voice mail provides every employee, every department, and 10 remote employees with private mailboxes. TeleCraft also provides 2 message only mailboxes, employee directory (dial-by-name), company and personal greetings, as well as step-by-step voice instructions. These instructions help you program your mail box, record your individual greetings, and manage your incoming messages.

**Voice mail notification** - Once a message arrives, TeleCraft calls your cell phone, your pager, or any combination of them. It calls once or until the message is taken. Follow the voice prompts to review, delete, undelete, or forward your messages.

**Automatic attendants** - The 3 auto attendants operate in several modes. They can answer any and all incoming lines, or be used only when the operator is busy. They play NIGHT and DAY greetings and support two businesses.

*TeleCraft offers much more than three receptionists working 24 hours a day.*

TeleCraft TC-616-VM4: Telephone System with Built-in Voice Mail and Caller ID.

# TeleCraft - The ideal full-featured, low-cost telephone system for the growing businesses and homes.

## TeleCraft keeps you in touch.

**Convenience** - Let calls quickly reach their destination. Handle calls in many ways depending on the time-of-day, the extension dialed, the line number, and toll restrictions. And most of all, program TeleCraft to fully match your needs.

**Call forwarding** - Route calls to your home, voice mail, cellular phone, or any other telephone.

**Public Announcement** - Anybody, even from outside the office, can use TeleCraft's public announcement feature. There is no need for additional wiring or costly amplifiers.

## TeleCraft eliminates busy signals.

**Back-up ringing** - When you are on the phone or away from your desk, TeleCraft directs your calls to your voice mail, cell phone, secretary, or the operator.

**Hunt groups** - Callers can easily reach the first available person in any department. For instance, when customers dial "2" for Sales, TeleCraft routes them to the first available salesperson.

## TeleCraft increases efficiency and convenience.

**Call pick up** - Answer any ringing telephone from your own extension.

**Caller ID** - Helps you screen calls. The auto attendants do not interfere.

**Automatic dialing** - TeleCraft can automatically dial any number just by lifting the handset.

**Speed dialing** - It stores 50 numbers of 40 digits each. It supports calling cards.

**Conference calls** - Add colleagues to create 3-way calls, even when they are outside your office.

**Music on hold** - Play music or your pre-recorded announcements.

**Distinctive rings** - Incoming calls ring differently than intercom calls.

**Door entry system** - Open doors and gates by a push of a button.

**Day or Night/Lunch service** - Service mode switching can be automatic or manual.
